

# Active rust remover

## OKS 661

**Chemically active rust remover for dissolving and removing stubborn rust during repair, maintenance and servicing tasks**

### Areas of application

- Separation of rusted metal surfaces
- Dissolving and re-establishment of the functionality of rusted threads
- Removal of rust film and rust stains
- Cleaning of metallic incrustations and oil residues

### Advantages and benefits

- Active dissolving of the rust layer
- Free of petrol and mineral oil
- Ecologically harmless
- Intensive effect due to longer exposure time
