

***For a world in motion***

Speciality Lubricants  
Maintenance Products

***OKS -  
your professional  
partner for  
Speciality Lubricants***

The OKS brand stands for high-performance products for reducing friction, wear and corrosion. Our tribological know-how ensures that your machines and systems operate efficiently even under the most demanding circumstances

**- at all times.**

Industrial and commercial users have been appreciating the high quality and reliability of our products for 35 years, and are also impressed by how quickly we can convert new requirements into intelligent and innovative solutions

**- worldwide.**

The products, developed by our onsite engineers at the corporate location of Maisach are produced according to strict quality requirements. Global sales are also effected from here, supported by our modern logistics centre

**- "just in time".**

Environmental protection and user safety are a high priority for us. We contribute to clearly reducing technically-determined environmental loads not only through our environmentally-aware management, but also especially by developing state-of-the-art lubricant products

**- by conviction.**

## ***German know-how for international markets***

Friction and wear costs several billion Euro throughout the world each year. When engineering graduate Friedrich Kuhn-Weiss founded **OmniKote Spezialschmierstoffe GmbH** in 1978, his aim was to minimise these costs by developing, producing and selling high-performance lubricants. As a pioneer of the MoS<sub>2</sub> lubricant technology, he incorporated his extensive experience into the company.

Since 2003, OKS Spezialschmierstoffe GmbH has been integrated in the internationally active Freudenberg Group. With more than 30,000 employees, the Group generates revenues of over EUR 5 billion. As part of the "Freudenberg Chemical Specialities" (FCS) division, OKS uses its comprehensive know-how and powers of innovation for the development of new products and the continued dynamic growth of the company. The FCS companies are market leaders in high-performance lubricants for industrial applications and release agents for the plastics, rubber and metal casting industries.

### ***OKS at a Glance***

- Founded:** In 1978 by engineering graduate F. Kuhn-Weiss
- Company profile:** Development, production and sales of speciality lubricants and chemotechnical products for industrial maintenance
- Headquarters:** Maisach, Germany
- Sales:** In over 50 countries worldwide
- Sales partners:** Over 400 technical retailers and mineral oil dealers
- Certifications:** ISO 9001, ISO 14001 and OHSAS 18001
- Affiliation:** A company of the Freudenberg Group since 2003

## ***Tribology is our passion***

Do you place increased lubricant-related requirements on your machines and systems? If so, talk to us or our sales partners. Our team of experts from various fields continuously develops new products and optimises our existing range in state-of-the-art laboratories. As a flexible, innovative company, we view challenges as an opportunity to demonstrate our abilities – day after day.

We ensure the high quality standards of our products by using employees who are experienced in production and development, as well as our extensive quality assurance measures that comply with DIN ISO 9001.

We want to make things as easy for you as possible, which is why our range of speciality lubricants and chemotechnical products for industrial maintenance as well as our comprehensive service package covers a large part of the tribological applications that occur in your company. You can reduce your supplier diversity and concentrate on other important aspects of your business.

## ***We're against friction***

Frictionless motion is humanity's dream, although it's not yet entirely without friction. To ensure your machines and systems run "friction-free", OKS has a lubrication solution for almost every application.

From maintenance products to speciality lubricants – OKS products stand for intelligent solutions for critical application conditions. Close collaboration between our development and production departments means that OKS can quickly implement new technologies in market-ready products. The increase in efficiency of our lubricants through the use of synthetic oils and high-performance additives as well as the development of a comprehensive range of dry lubricants are examples of our specialists' competence.

OKS products all come from a single source, since our lubricants not only solve your tribological problems securely and reliably, they also offer you significant cost benefits through their efficiency and cost-effectiveness. Set us a challenge.

### ***Over 150 high-performance products from one supplier***

- Pastes** for easy assembly and dismantling
- Oils** with high-performance additives for reliable lubrication
- Greases** for long-term lubrication under critical operating conditions
- Dry lubricants** – the alternative for special application cases
- Corrosion protection** for reliable preservation during storage and shipping
- Maintenance products** for ongoing service
- Cleaners** for thorough removal of soiling and lubricant residues

***High availability  
through global  
logistics***

You can find OKS sales partners in more than 50 countries and we are continuously expanding to others. This is made possible by our efficient sales and logistics concept. Around the globe, our specialist dealers are delivered "just in time", enabling our sales partners to undertake for you logistical tasks such as procurement, delivering supplies to cost centres and inventory management.

Increasing numbers of customers use the global OKS sales network to use the same products with the same quality standards at all locations. To meet increasing demands in supply chain management, we set up a new, modern logistics centre in 2003, where we make sure that our high-performance products are always available to you.

## ***Competence through customer proximity***

OKS has been the preferred brand in the specialist trade for high-performance lubricants and chemotechnical products for industrial maintenance for many years. We rely on competent sales partners in the technical trade and in the mineral oil trade since they understand precisely the needs of their local customers.

Only selected retailers carry the OKS product range. We support our sales partners worldwide with an extensive training and further education program and also offer a qualified technical support service. Take advantage of your OKS sales partner's skills on-site. If any special requirements arise, our partner will work together with you and us to develop a new range of alternative and innovative solutions.

## ***6 good reasons for OKS***

- **Strong partner:** Over 35 years of tribological know-how combined with the innovative powers of the Freudenberg Group
- **Quality designed in Germany:** High-performance products developed and produced to meet the highest quality requirements
- **Customer benefits include:** Longer service lives, extended maintenance intervals, minimal consumption and high reliability
- **From a single source:** Thanks to a wide range of speciality lubricants and chemotechnical products for industrial maintenance
- **Customer proximity:** Qualified support from trained on-site sales partners
- **Sophisticated logistics:** For a global delivery "just in time"
