### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

If inhaled	<ul> <li>Obtain medical attention. Remove person to fresh air. If signs/symptoms continue, get medical attention. Keep patient warm and at rest. If unconscious, place in recovery position and seek medical advice. Keep respiratory tract clear. If breathing is irregular or stopped, administer artificial respira- tion.</li> </ul>
In case of skin contact	<ul> <li>Take off all contaminated clothing immediately.</li> <li>Wash off immediately with soap and plenty of water.</li> <li>Get medical attention immediately if irritation develops and persists.</li> <li>Wash clothing before reuse.</li> <li>Thoroughly clean shoes before reuse.</li> </ul>
In case of eye contact	<ul> <li>Rinse immediately with plenty of water, also under the eyelids, for at least 10 minutes.</li> <li>If eye irritation persists, consult a specialist.</li> </ul>
If swallowed	<ul> <li>Move the victim to fresh air.</li> <li>Keep respiratory tract clear.</li> <li>Do NOT induce vomiting.</li> <li>Obtain medical attention.</li> <li>Rinse mouth with water.</li> </ul>
4.2 Most important symptoms	and effects, both acute and delayed
Symptoms	<ul> <li>Inhalation may provoke the following symptoms: Unconsciousness Dizziness</li> <li>Drowsiness</li> <li>Headache</li> <li>Nausea</li> <li>Tiredness</li> <li>Allergic appearance</li> </ul>

Risks : Causes skin irritation.

May cause an allergic skin reaction.

#### 4.3 Indication of any immediate medical attention and special treatment needed

:

Treatment

The first aid procedure should be established in consultation with the doctor responsible for industrial medicine. Treat symptomatically.

### **SECTION 5: Firefighting measures**

### 5.1 Extinguishing media

Suitable extinguishing media	:	ABC powder
Unsuitable extinguishing media	:	High volume water jet

### 5.2 Special hazards arising from the substance or mixture

Specific hazards during fire fighting	e- :	Fire Hazard Do not let product enter drains. Contains gas under pressure; may explode if heated. Beware of vapours accumulating to form explosive concentra- tions. Vapours can accumulate in low areas.
Hazardous combustion pro ucts	od- :	Carbon oxides
5.3 Advice for firefighters		
Special protective equipme for firefighters	ent :	In the event of fire, wear self-contained breathing apparatus. Use personal protective equipment. Exposure to decomposi- tion products may be a hazard to health.
Further information	:	Standard procedure for chemical fires. Collect contaminated fire extinguishing water separately. This must not be discharged into drains. Cool containers/tanks with water spray.

## **SECTION 6: Accidental release measures**

### 6.1 Personal precautions, protective equipment and emergency procedures

: Evacuate personnel to safe areas.
Ensure adequate ventilation.
Remove all sources of ignition.
Do not breathe vapours or spray mist.
Refer to protective measures listed in sections 7 and 8.
Only qualified personnel equipped with suitable protective
equipment may intervene.

#### 6.2 Environmental precautions

Environmental precautions	<ul> <li>Do not allow contact with soil, surface or ground water. Prevent further leakage or spillage if safe to do so.</li> <li>Local authorities should be advised if significant spillages cannot be contained.</li> </ul>	6
Environmental precautions	Prevent further leakage or spillage if safe to do so. Local authorities should be advised if significant spillages	

## 6.3 Methods and material for containment and cleaning up

Methods for cleaning up	<ul> <li>Contain spillage, and then collect with non-combustible absorbent material, (e.g. sand, earth, diatomaceous earth, vermiculite) and place in container for disposal according to local / national regulations (see section 13).</li> <li>Keep in suitable, closed containers for disposal.</li> <li>Non-sparking tools should be used.</li> </ul>

#### 6.4 Reference to other sections

For personal protection see section 8.

### **SECTION 7: Handling and storage**

#### 7.1 Precautions for safe handling

I Flecautions for sale handling	
Advice on safe handling :	Do not use in areas without adequate ventilation. Do not breathe vapours or spray mist. In case of insufficient ventilation, wear suitable respiratory equipment. Avoid contact with skin and eyes. For personal protection see section 8. Keep away from fire, sparks and heated surfaces. Persons with a history of skin sensitisation problems or asth- ma, allergies, chronic or recurrent respiratory disease should not be employed in any process in which this mixture is being used. Smoking, eating and drinking should be prohibited in the ap- plication area. Wash hands and face before breaks and immediately after handling the product. Do not get in eyes or mouth or on skin. Do not get on skin or clothing. Do not use sparking tools. These safety instructions also apply to empty packaging which may still contain product residues. Pressurized container: protect from sunlight and do not ex- pose to temperatures exceeding 50 °C. Do not pierce or burn, even after use.
Hygiene measures :	Wash face, hands and any exposed skin thoroughly after handling.

#### 7.2 Conditions for safe storage, including any incompatibilities

Requirements for storage areas and containers	:	BEWARE: Aerosol is pressurized. Keep away from direct sun exposure and temperatures over 50 °C. Do not open by force
		or throw into fire even after use. Do not spray on flames or red-hot objects. Store in accordance with the particular na- tional regulations.
		Protect from frost.

## 8.2 Exposure controls

#### **Engineering measures**

Use only in an area equipped with explosion proof exhaust ventilation. Handle only in a place equipped with local exhaust (or other appropriate exhaust).

Personal protective equipment						
Eye protection :	Safety glasses with side-shields					
Break through time :	Nitrile rubber > 10 min Class 1					
Remarks :	For prolonged or repeated contact use protective gloves. The break through time depends amongst other things on the material, the thickness and the type of glove and therefore has to be measured for each case. The selected protective gloves have to satisfy the specifica- tions of Regulation (EU) 2016/425 and the standard EN 374 derived from it.					
Skin and body protection :	Choose body protection in relation to its type, to the concen- tration and amount of dangerous substances, and to the spe- cific work-place.					
Respiratory protection :	Use respiratory protection unless adequate local exhaust ven-

Note C :	Some organic substances may be marketed either in a specif- ic isomeric form or as a mixture of several isomers. In this case the supplier must state on the label whether the sub- stance is a specific isomer or a mixture of isomers.
Note U (table 3.1) :	When put on the market gases have to be classified as "Gas- es under pressure", in one of the groups compressed gas, liquefied gas, refrigerated liquefied gas or dissolved gas. The group depends on the physical state in which the gas is pack- aged and therefore has to be assigned case by case. The following codes are assigned: Press. Gas (Comp.) Press. Gas
